FOREWORD

General Welfare Assistance

All municipalities with population in excess of 20,000 and all County Welfare Units and District Administration Boards are included in the statistics. Approximately 90 per cent of the provincial population resides in an area where General Assistance is administered by a municipality, County Welfare Unit or District Administration Board that is included in the bulletin. All tables on General Assistance are based on unaudited figures supplied by the municipalities.

Child Welfare

This section consists of tables providing data pertaining to children in the care of Children's Aid Societies.

It should be noted that for comparative purposes the basic data are reported monthly. However, additional tables are included in the bulletin on an ad hoc basis.

Unemployment Statistics

Based on its labour force survey Statistics Canada estimates the size of the labour force and the number of individuals employed and unemployed. This survey samples 30,000 households chosen by area sampling methods across the country. Indians living on reserves, inmates of institutions and members of the armed forces are excluded from the sample. The definitions and explanations used by Statistics Canada are as follows:

Labour Force - The civilian labour force is composed of that portion of the civilian noninstitutional population 14 years of age and over who, during the reference week, were employed or unemployed.

CA24N
SM 62
-M 57

FOREWORD (Continued)

Employed - The employed includes all persons who, during the reference week: (a) did any work for pay or profit; (b) did any work which contributed to the running of a farm or business operated by a related member of the household; or (c) had a job, but were not at work, because of bad weather, illness, industrial dispute, or vacation, or because they were taking time off for other reasons. Persons who had jobs but did not work during the reference week and who also looked for work are included in the unemployed as persons without work and seeking work.

Unemployed - The unemployed includes all persons who, through the reference week: (a) were without work and seeking work, i.e., did not work during the reference week and were looking for work; or would have been looking for work except that they were temporarily ill, were on indefinite or prolonged layoff, or believed no suitable work was available in the community; or (b) were temporarily laid off for the full week, i.e., were waiting to be called back to a job from which they had been laid off for less than 30 days.

Not in the Labour Force - Those not in the labour force include all civilians 14 years of age and over (exclusive of institutional population) who are not classified as employed or unemployed. This category includes those: going to school; keeping house; too old or otherwise unable to work; and voluntarily idle or retired. Housewives, students and others who worked part-time are classified as employed. If they looked for work they are classified as unemployed.

The number of unemployment insurance claimants and the estimated number of unemployment insurance beneficiaries is compiled by Statistics Canada from material supplied by the Unemployment Insurance Commission. The number of unemployment insurance beneficiaries is the estimate of the number of claimants who received payment from the Commission during the month.

Differences between the number of unemployment insurance claimants and the number of persons unemployed according to the labour force survey have been explained as follows:

(a) Coverage. An individual without work and seeking work in the reference week and who was not covered by unemployment insurance (such as a new entrant into the labour market) would be considered "unemployed" in the labour force survey but likely would not be an unemployment insurance claimant.

FOREWORD (Continued)

(b) Timing. The labour force survey is conducted at mid-week whereas unemployment insurance data are taken at the end of the month. This difference in timing would be particularly important in periods of rapidly changing employment levels.

(c) Definition. An individual is considered an unemployment insurance claimant when a claim for benefits is registered with the Commission, and remains a claimant until 4 - 6 weeks after the claim has been disqualified or benefits cease. If the claim is disqualified and the individual appeals the disqualification he is considered a claimant while the appeal is pending.

The definition used by the labour force survey would consider as employed an unemployment insurance claimant who worked part-time while drawing benefits.

HIGHLIGHTS

The two income maintenance programs available through provincial legislation are the municipally administered General Assistance program and the provincially administered Family Benefits program. The latter is designed to assist persons likely to require long-term assistance: the aged, widowed, blind, disabled and families where the male head is absent or permanently disabled. The General Assistance program is designed to assist persons who do not qualify for Family Benefits such as those who are unemployed but employable and separated women with dependent children.

General Assistance

General Assistance statistics are included in the bulletin for all municipalities with population in excess of 20,000 and all County Welfare Units and District Administration Boards. About 90.0 per cent of the provincial population resides in an area where General Assistance is administered by a municipality, County Welfare Unit or District Administration Board that is included in the bulletin.

As is indicated in Table 1, total caseload in January 1974, excluding hostel residents, was 56,571 of which single persons, foster children and recipients in nursing homes constituted 54.6 per cent and family units 45.4 per cent of the total. The number of dependents was 62,192 or an average of 3.4 persons per family unit receiving General Assistance. In comparison to previous monthly single persons and family units categories increased from 46,506 in December 1973 to 53,390 in January 1974 or 14.8 per cent, while total number of beneficiaries marked 16.3 per cent increase.

Table 1A provides a distribution of a basic category of recipients by class, sex and locality. As can be seen from this table, 60.4 per cent of recipients are unemployable, the highest proportion of which is female family heads.

Information on transients and hostel residents is reported in Table 1B. It should be noted that data in this table are of general, incomplete and unaudited nature and do not lend themselves for comparison purposes.

Tables 2 and 2A provide a breakdown of General Assistance expenditures by various items. For the areas covered by the bulletin, the allowances totalled approximately \$9.1 million in January 1974, of which about 53 per cent were allocated to ordinary needs and 32 per cent to shelter.

HIGHLIGHTS (Continued)

Tables 3 and 3A provide a geographic distribution of the number of beneficiaries in January 1974 in comparison to the assessed population for a corresponding area in 1973. While the number of General Assistance beneficiaries averaged 1.7 per cent of the assessed population, it ranged from 0.5 per cent in Halton Regional Municipality to 4.6 per cent in Algoma District Administration Board. In large population centres, such as Metropolitan Toronto and Ottawa-Carleton Regional Municipality the number of beneficiaries averaged 1.6 and 2.2 per cent respectively.

Child Welfare

Tables included in the bulletin contain a statistical analysis of the Child Welfare program covering the Children's Aid Societies throughout Ontario. Of particular interest are Tables 4 to 8. They contain basic data on monthly changes in caseload of children in care, their parents and services provided to them. The other tables provide more detailed analysis of various aspects of the Child Welfare program. They are included in the bulletin on an ad hoc basis.

As is indicated in Table 4, in January 1974, the total caseload of children in care was 14,201 or 68 cases below the December 1973 level. Table 5 indicates that 13,686 family units throughout Ontario received protection and prevention services involving 33,429 children. Tables 6 and 7 provide information on the caseload of children of unmarried parents in care and on services being rendered to them. In January 1974, the total caseload of children of unmarried mothers was 3,870, involving 244 admissions and 314 discharges. Services to unmarried parents and their children involved 2,475 cases, an increase of 13 cases in comparison to the previous month. As can be seen from Table 8, the total caseload of children on adoption probation in January 1974 was 1,919 or 156 cases below the December 1973 level.

FOREWORD

General Welfare Assistance

All municipalities with population in excess of 20,000 and all County Welfare Units and District Administration Boards are included in the statistics. Approximately 90 per cent of the provincial population resides in an area where General Assistance is administered by a municipality, County Welfare Unit or District Administration Board that is included in the bulletin. All tables on General Assistance are based on unaudited figures supplied by the municipalities.

Child Welfare

This section consists of tables providing data pertaining to children in the care of Children's Aid Societies.

It should be noted that for comparative purposes the basic data are reported monthly. However, additional tables are included in the bulletin on an ad hoc basis.

Unemployment Statistics

Based on its labour force survey Statistics Canada estimates the size of the labour force and the number of individuals employed and unemployed. This survey samples 30,000 households chosen by area sampling methods across the country. Indians living on reserves, inmates of institutions and members of the armed forces are excluded from the sample. The definitions and explanations used by Statistics Canada are as follows:

Labour Force - The civilian labour force is composed of that portion of the civilian noninstitutional population 14 years of age and over who, during the reference week, were employed or unemployed.

FOREWORD (Continued)

Employed - The employed includes all persons who, during the reference week: (a) did any work for pay or profit; (b) did any work which contributed to the running of a farm or business operated by a related member of the household; or (c) had a job, but were not at work, because of bad weather, illness, industrial dispute, or vacation, or because they were taking time off for other reasons. Persons who had jobs but did not work during the reference week and who also looked for work are included in the unemployed as persons without work and seeking work.

Unemployed - The unemployed includes all persons who, through the reference week: (a) were without work and seeking work, i.e., did not work during the reference week and were looking for work; or would have been looking for work except that they were temporarily ill, were on indefinite or prolonged layoff, or believed no suitable work was available in the community; or (b) were temporarily laid off for the full week, i.e., were waiting to be called back to a job from which they had been laid off for less than 30 days.

Not in the Labour Force - Those not in the labour force include all civilians 14 years of age and over (exclusive of institutional population) who are not classified as employed or unemployed. This category includes those: going to school, keeping house; too old or otherwise unable to work; and voluntarily idle or retired. Housewives, students and others who worked part-time are classified as employed. If they looked for work they are classified as unemployed.

The number of unemployment insurance claimants and the estimated number of unemployment insurance beneficiaries is compiled by Statistics Canada from material supplied by the Unemployment Insurance Commission. The number of unemployment insurance beneficiaries is the estimate of the number of claimants who received payment from the Commission during the month.

Differences between the number of unemployment insurance claimants and the number of persons unemployed according to the labour force survey have been explained as follows:

(a) Coverage. An individual without work and seeking work in the reference week and who was not covered by unemployment insurance (such as new entrants into the labour market) would be considered "unemployed" in the labour force survey but likely would not be an unemployment insurance claimant.

FOREWORD (Continued)

(b) Timing. The labour force survey is conducted at mid-week whereas unemployment insurance data are taken at the end of the month. This difference in timing would be particularly important in periods of rapidly changing employment levels.

(c) Definition. An individual is considered an unemployment insurance claimant when a claim for benefits is registered with the Commission, and remains a claimant until 4 - 6 weeks after the claim has been disqualified or benefits cease. If the claim is disqualified and the individual appeals the disqualification he is considered a claimant while the appeal is pending.

The definition used by the labour force survey would consider as employed an unemployment insurance claimant who worked part-time while drawing benefits.

HIGHLIGHTS

The two income maintenance programs available through provincial legislation are the municipally administered General Welfare Assistance program and the provincially administered Family Benefits program. The latter is designed to assist persons likely to require long-term assistance: the aged, widowed, blind, disabled and families where the male head is absent or permanently disabled. The General Assistance program is designed to assist persons who do not qualify for Family Benefits, such as those who are unemployed but employable and separated women with dependent children.

General Assistance

General Assistance statistics are included in the bulletin for all municipalities with population in excess of 20,000 and all County Welfare Units and District Administration Boards. About 90.0 per cent of the provincial population resides in an area where General Assistance is administered by a municipality, County Welfare Unit or District Administration Board that is included in the bulletin.

As is indicated in Table 1, total caseload in February 1974, excluding hostel residents, was 56,425, of which single persons, foster children and recipients in nursing homes constituted 54.4 per cent and family units 45.6 per cent of the total. The number of dependents was 61,565 or an average of 3.4 persons per family unit receiving General Assistance. In comparison to previous month, single persons and family units categories increased from 53,390 in January 1974 to 53,730 in February 1974 or 0.6 per cent, while total number of beneficiaries declined by 0.7 per cent.

Table 1A provides a geographic distribution of a basic category of single persons and family units by class and sex. As can be seen from this table, 61.8 per cent of recipients are unemployable, the highest proportion of which (22.3 per cent) is female headed family units.

Information on transients and hostel residents is reported in Table 1B. It should be noted that data in this table are incomplete and unaudited and do not lend themselves for comparison purposes.

Tables 2 and 2A provide a breakdown of General Assistance expenditures by various items. For the areas covered by the bulletin, the allowances totalled about \$8.5 million in February 1974, of which 52.7 per cent were allocated to ordinary needs and 34.9 per cent to shelter.

HIGHLIGHTS (Continued)

Tables 3 and 3A provide a geographic distribution of the number of beneficiaries in February 1974 with corresponding information on the assessed population. While the number of General Assistance beneficiaries averaged 1.7 per cent of the assessed population, it ranged from 0.5 per cent in Halton Regional Municipality to 4.3 per cent in Algoma District Administration Board. In large population centres, such as Metropolitan Toronto and Ottawa-Carleton Regional Municipality the number of beneficiaries averaged 1.6 and 2.2 per cent respectively.

Child Welfare

Tables included in the bulletin contain a statistical information of the Child Welfare program covering the Children's Aid Societies throughout Ontario. Of particular interest are tables 4 to 8. They contain basic data on monthly changes in caseload of children in care, their parents and services provided to them. The other tables provide more detailed analysis of various aspects of the Child Welfare program. They are included in the bulletin on an ad hoc basis.

As is indicated in Table 4, in February 1974, the total caseload of children in care was 14,250 or 49 cases below the January 1974 level. Table 5 indicates that 13,875 family units throughout Ontario received protection and prevention services involving 33,802 children. Tables 6 and 7 provide information on the caseload of children of unmarried parents in care and on services being rendered to them. In February 1974, the total caseload of children of unmarried mothers was 3,822, involving 251 admissions and 299 discharges. Services to unmarried parents and their children involved 2,515 cases; an increase of 40 cases in comparison to the previous month. As can be seen from Table 8, the total caseload of children on adoption probation in February 1974 was 1,818 or 101 cases below the January 1974 level.

FOREWORD

General Welfare Assistance

All municipalities with population in excess of 20,000 and all County Welfare Units and District Administration Boards are included in the statistics. Approximately 90 per cent of the provincial population resides in an area where General Assistance is administered by a municipality, County Welfare Unit or District Administration Board that is included in the bulletin. All tables on General Assistance are based on unaudited figures supplied by the municipalities.

Child Welfare

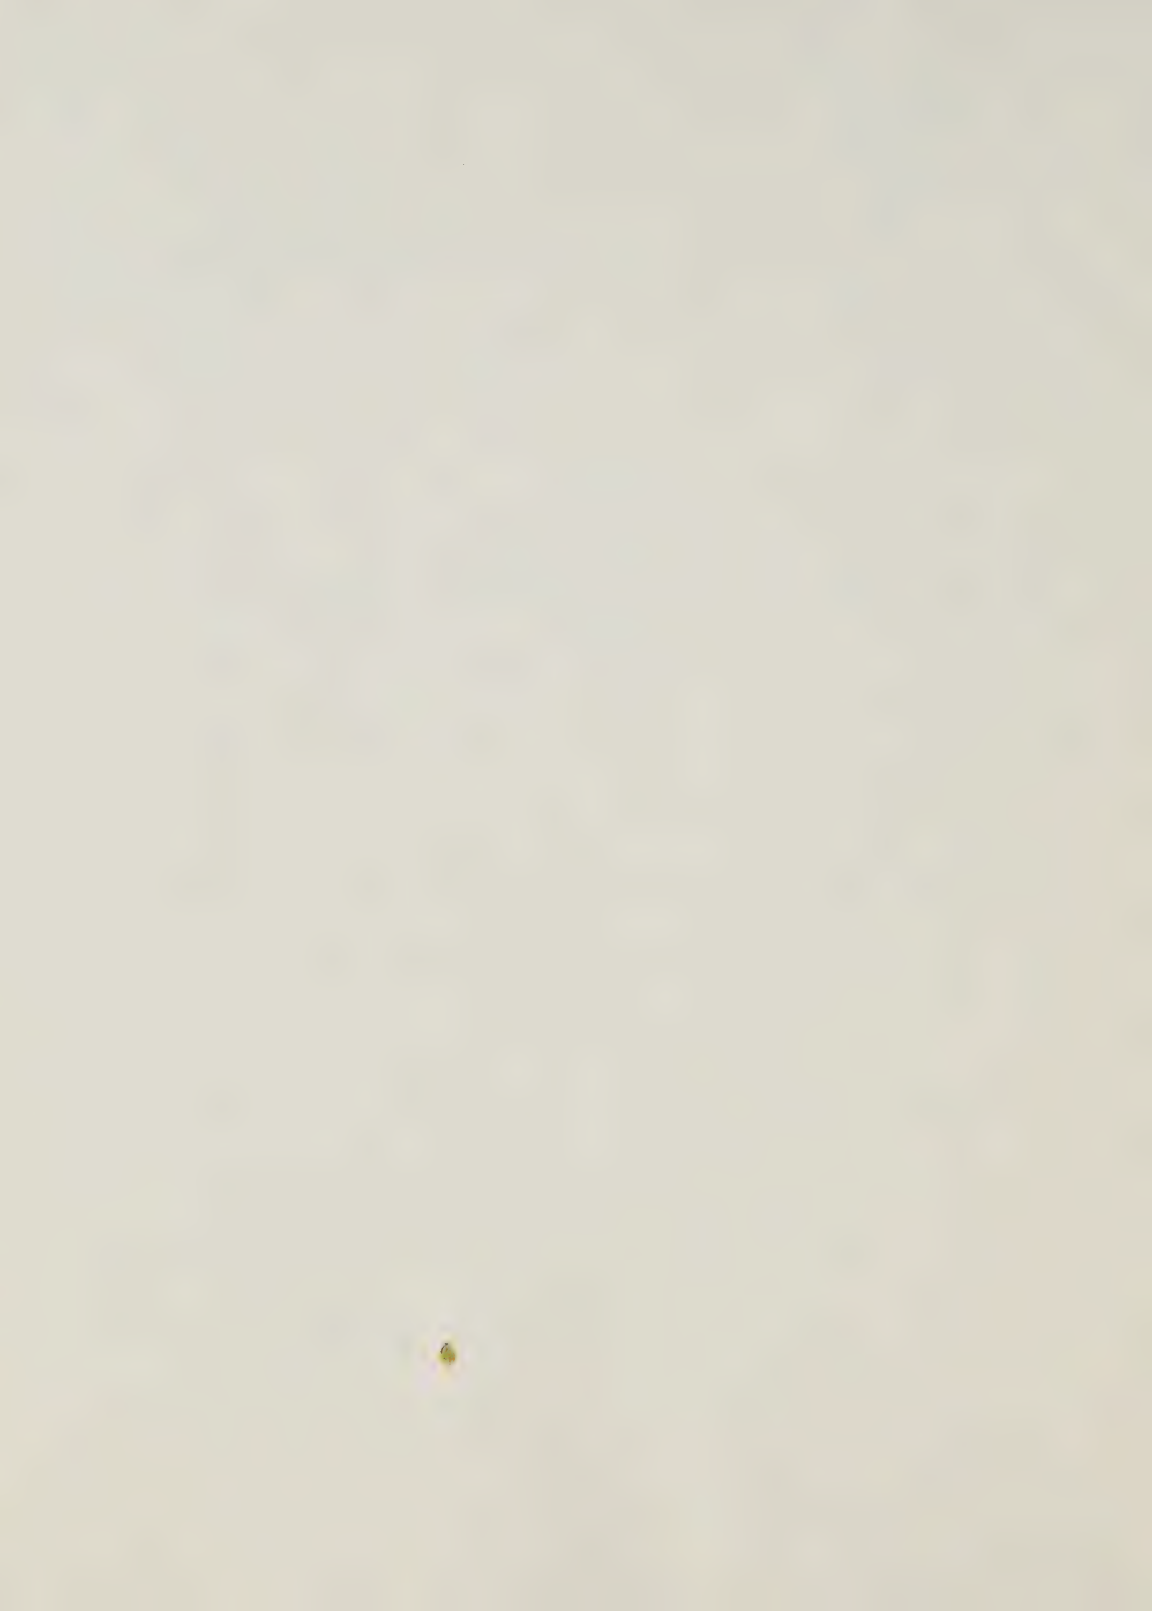

This section consists of tables providing data pertaining to children in the care of Children's Aid Societies.

It should be noted that for comparative purposes the basic data are reported monthly. However, additional tables are included in the bulletin on an ad hoc basis.

Unemployment Statistics

Based on its labour force survey Statistics Canada estimates the size of the labour force and the number of individuals employed and unemployed. This survey samples 30,000 households chosen by area sampling methods across the country. Indians living on reserves, inmates of institutions and members of the armed forces are excluded from the sample. The definitions and explanations used by Statistics Canada are as follows:

Labour Force - The civilian labour force is composed of that portion of the civilian noninstitutional population 14 years of age and over who, during the reference week, were employed or unemployed.

FOREWORD (Continued)

Employed - The employed includes all persons who, during the reference week: (a) did any work for pay or profit; (b) did any work which contributed to the running of a farm or business operated by a related member of the household; or (c) had a job, but were not at work, because of bad weather, illness, industrial dispute, or vacation, or because they were taking time off for other reasons. Persons who had jobs but did not work during the reference week and who also looked for work are included in the unemployed as persons without work and seeking work.

Unemployed - The unemployed includes all persons who, through the reference week: (a) were without work and seeking work, i.e., did not work during the reference week and were looking for work; or would have been looking for work except that they were temporarily ill, were on indefinite or prolonged layoff, or were temporarily laid off for the full week, i.e., were waiting to be called back to a job from which they had been laid off for less than 30 days.

Not in the Labour Force - Those not in the labour force include all civilians 14 years of age and over (exclusive of institutional population) who are not classified as employed or unemployed. This category includes those: going to school, keeping house; too old or otherwise unable to work; and voluntarily idle or retired. Housewives, students and others who worked part-time are classified as employed. If they looked for work they are classified as unemployed.

The number of unemployment insurance claimants is compiled by Statistics Canada from material supplied by the Unemployment Insurance Commission.

Differences between the number of unemployment insurance claimants and the number of persons unemployed according to the labour force survey have been explained as follows:

(a) Coverage. An individual without work and seeking work in the reference week and who was not covered by unemployment insurance (such as new entrants into the labour market) would be considered "unemployed" in the labour force survey but likely would not be an unemployment insurance claimant.

FOREWORD (Continued)

(b) Timing. The labour force survey is conducted at mid-week whereas unemployment insurance data are taken at the end of the month. This difference in timing would be particularly important in periods of rapidly changing employment levels.

(c) Definition. An individual is considered an unemployment insurance claimant when a claim for benefits is registered with the Commission, and remains a claimant until 4 - 6 weeks after the claim has been disqualified or benefits cease. If the claim is disqualified and the individual appeals the disqualification he is considered a claimant while the appeal is pending.

The definition used by the labour force survey would consider as employed an unemployment insurance claimant who worked part-time while drawing benefits.

NOTE:

Recently a new computerized system called ONTAP has been introduced for the Provincial Benefits Branch. Testing of the March 1974 data showed incomplete results. Because of this, Family Benefits statistics are not published in the March 1974 bulletin. They will be provided on a monthly basis starting with the April 1974 bulletin.

HIGHLIGHTS

The two income maintenance programmes available through provincial legislation are the municipally administered General Assistance program and the provincially administered Family Benefits program. The latter is designed to assist persons likely to require long-term assistance: the aged, widowed, blind, disabled and families where the male head is absent or permanently disabled. The General Assistance program is designed to assist persons who do not qualify for Family Benefits, such as those who are unemployed but employable and separated women with dependent children.

General Assistance

General Assistance statistics are included in the bulletin for all municipalities with population in excess of 20,000 and all County Welfare Units and District Administration Boards. About 90.0 per cent of the provincial population resides in an area where General Assistance is administered by a municipality, County Welfare Unit or District Administration Board that is included in the bulletin.

As is indicated in Table 1, total caseload in March 1974, excluding hostel residents, was 55,985 of which single persons, foster children and recipients in nursing homes constituted 54.4 per cent and family units 45.6 per cent of the total. The number of dependents was 60,524 or an average of 3.4 persons per family unit receiving General Assistance in comparison to previous month, single persons and family units categories decreased from 53,700 in February 1974 to 53,369 in March 1974, or 0.6 per cent, while total number of beneficiaries declined by 1.7 per cent.

Table 1A provides a geographic distribution of a basic category of single persons and family units by class and sex. As can be seen from this table, 63.5 per cent of recipients are being reported as unemployable, the highest proportion of which (23.4 per cent) in female headed family units.

Information on transients and hostel residents is reported in Table 1B. It should be noted that data in this table are incomplete and unaudited and do not lend themselves for comparison purposes.

Tables 2 and 2A provide a breakdown of General Assistance expenditures by various items. For the areas covered by the bulletin the allowances totalled approximately \$8.2 million in March 1974, of which 50.8 per cent were allocated to ordinary needs and 36.0 per cent to shelter.

HIGHLIGHTS (Continued)

Tables 3 and 3A provide a geographic distribution of the number of beneficiaries in March 1974, with corresponding data on the assessed population. While the number of General Assistance beneficiaries averaged 1.6 per cent of the assessed population, it ranged from 0.5 per cent in Halton Regional Municipality and Perth County Unit to 4.0 per cent in Algoma District Administration Board. In large population centres such as Metropolitan Toronto and Ottawa - Carleton Regional Municipality the number of beneficiaries averaged 1.6 and 2.2 per cent respectively.

Child Welfare

Tables included in the bulletin contain a statistical information of the Child Welfare program covering the Children's Aid Societies throughout Ontario. Of particular interest are Tables 4 to 8. They contain basic data on monthly changes in caseload of children in care, their parents and services provided to them. The other tables provide more detailed analysis of various aspects of the Child Welfare program. They are included in the bulletin on an ad hoc basis.

As is indicated in Table 4, in March 1974 the total caseload of children in care was 14,243 or 7 cases below the February 1974 level. Table 5 indicates that 14,049 family units through-out Ontario received protection and prevention services involving 34,276 children. Tables 6 and 7 provide information on the caseload of children of unmarried parents in care and on services being rendered to them. In March 1974, the total caseload of children of unmarried mothers was 3,771, involving 249 admissions and 300 discharges. Services to unmarried parents and their children involved 2,422 cases or 93 cases below the February 1974 level. As can be seen from Table 8, the total caseload of children on adoption probation in March 1974, was 1,763; a decline of 55 cases in comparison to the previous month.

FOREWORD

General Welfare Assistance

All municipalities with population in excess of 20,000 and all County Welfare Units and District Administration Boards are included in the statistics. Approximately 90 per cent of the provincial population resides in an area where General Assistance is administered by a municipality, County Welfare Unit or District Administration Board that is included in the bulletin. All tables on General Assistance are based on unaudited figures supplied by the municipalities.

Family Benefits

Family Benefits data presentation is similar to that regularly used for General Welfare Assistance statistics. For example, where appropriate, Family Benefits data have been grouped to conform to General Welfare Assistance Administration Boards. However, totals for the areas in the Family Benefits tables reflect the entire area rather than only selected municipalities within the area.

Child Welfare

This section consists of tables providing data pertaining to children in the care of Children's Aid Societies.

It should be noted that for comparative purposes the basic data are reported monthly. However, additional tables are included in the bulletin on an ad hoc basis.

FOREWORD (continued)

Unemployment Statistics

Based on its labour force survey Statistics Canada estimates the size of the labour force and the number of individuals employed and unemployed. This survey samples 30,000 households chosen by area sampling methods across the country. Indians living on reserves, inmates of institutions and members of the armed forces are excluded from the sample. The definitions and explanations used by Statistics Canada are as follows:

Labour Force - The civilian labour force is composed of that portion of the civilian noninstitutional population 14 years of age and over who, during the reference week, were employed or unemployed.

Employed - The employed includes all persons who, during the reference week: (a) did any work for pay or profit; (b) did any work which contributed to the running of a farm or business operated by a related member of the household; or (c) had a job, but were not at work, because of bad weather, illness, industrial dispute, or vacation, or because they were taking time off for other reasons. Persons who had jobs but did not work during the reference week and who also looked for work are included in the unemployed as persons without work and seeking work.

Unemployed - The unemployed includes all persons who, through the reference week: (a) were without work and seeking work, i.e., did not work during the reference week and were looking for work; or would have been looking for work except that they were temporarily ill, were on indefinite or prolonged layoff, or were temporarily laid off for the full week, i.e., were waiting to be called back to a job from which they had been laid off for less than 30 days.

Not in the Labour Force - Those not in the labour force include all civilians 14 years of age and over (exclusive of institutional population) who are not classified as employed or unemployed. This category includes those: going to school, keeping house; too old or otherwise unable to work; and voluntarily idle or retired. Housewives, students and others who worked part-time are classified as employed. If they looked for work they are classified as unemployed.

The number of unemployment insurance claimants is compiled by Statistics Canada from material supplied by the Unemployment Insurance Commission.

Differences between the number of unemployment insurance claimants and the number of persons unemployed according to the labour force survey have been explained as follows:

FOREWORD (continued)

(a) Coverage. An individual without work and seeking work in the reference week and who was not covered by unemployment insurance (such as new entrants into the labour market) would be considered "unemployed" in the labour force survey but likely would not be an unemployment insurance claimant.

(b) Timing. The labour force survey is conducted at mid-week whereas unemployment insurance data are taken at the end of the month. This difference in timing would be particularly important in periods of rapidly changing employment levels.

(c) Definition. An individual is considered an unemployment insurance claimant when a claim for benefits is registered with the Commission, and remains a claimant until 4 - 6 weeks after the claim has been disqualified or benefits cease. If the claim is disqualified and the individual appeals the disqualification he is considered a claimant while the appeal is pending.

The definition used by the labour force survey would consider as employed an unemployment insurance claimant who worked part-time while drawing benefits.

HIGHLIGHTS

The two income maintenance programs available through provincial legislation are the municipally administered General Assistance program and the provincially administered Family Benefits program. The latter is designed to assist persons likely to require long-term assistance: the aged, widowed, blind, disabled and families where the male head is absent or permanently disabled. The General Assistance program is designed to assist persons who do not qualify for Family Benefits, such as those who are unemployed but employable and separated women with dependent children.

GENERAL ASSISTANCE

General Assistance statistics are included in the bulletin for all municipalities with population in excess of 20,000 and all County Welfare Units and District Administration Boards. About 90.0 per cent of the provincial population resides in an area where General Assistance is administered by a municipality, County Welfare Unit or District Administration Board that is included in the bulletin.

As is indicated in Table 1, total caseload in April 1974, excluding hostel residents was 54,976, of which single persons, foster children and recipients in nursing homes constituted 54.3 per cent and family units 45.7 per cent of the total. The number of dependents was 59,209 or an average of 3.4 persons per family unit receiving General Assistance. In comparison to previous month, single persons and family units categories decreased from 53,369 in March 1974 to 52,310 in April 1974, or 2.0 per cent, reflecting the same decline in total number of beneficiaries.

Table 1A provides a geographic distribution of a basic category of single persons and family units by class and sex. As can be seen from this table, 64.8 per cent of recipients are being reported as unemployable, the highest proportion of which (23.8 per cent) is female headed family units.

Information on transients and hostel residents is reported in Table 1B. It should be noted that data in this table are incomplete and unaudited and do not lend themselves for comparison purposes.

Tables 2 and 2A provide a breakdown of General Assistance expenditures by various items. For the areas covered by the bulletin, the allowances totalled approximately \$8.4 million in April 1974, of which 51.6 per cent were allocated to ordinary needs and 34.7 per cent to shelter.

Tables 3 and 3A provide a geographic distribution of the number of beneficiaries in April 1974, with corresponding data on the assessed population. While the number of General Assistance Beneficiaries averaged 1.6 per cent of the assessed population, it ranged from 0.5 per cent in Perth County Unit and Halton Regional Municipality to 4.0 per cent in Prescott and Russell County Unit. In large population centres, such as Metropolitan Toronto and Ottawa-Carleton Regional Municipality the number of beneficiaries averaged 1.6 and 2.1 per cent respectively.

Family Benefits

Tables 4 to 5A provide a statistical analysis of the Family Benefits program. The Family Benefits data comprise the entire province as opposed to only the selected areas reported in the General Assistance Section.

As can be seen from Table 4, the total Family Benefits caseload was 92,982 and the total expenditures amounted to \$17.8 million.

Tables 5 and 5A provide a distribution of beneficiaries by area and in descending order. Although the percentage of beneficiaries in April 1973 averaged 2.6 per cent, it ranged from 0.9 per cent in Regional Municipalities of Peel and Halton to 10.4 per cent in Manitoulin District.

Child Welfare

Tables included in the bulletin contain statistical information of the Child Welfare program covering the Children's Aid Societies throughout Ontario. Of particular interest are Tables 7 to 11. They contain basic data on monthly changes in caseload of children in care, their parents and services provided to them. The other tables provide more detailed analysis of various aspects of the Child Welfare program. They are included in the bulletin on an ad hoc basis.

As is indicated in Table 7, in April 1974, the total caseload of children in care was 14,302 or 59 cases above the March 1974 level. Table 8 indicates that 14,202 family units throughout Ontario received protection and prevention services involving 34,520 children. Tables 9 and 10 provide information on the caseload of children of unmarried parents in care and on services being rendered to them. In April 1974, the total caseload of children of unmarried mothers was 3,764 involving 253 admissions and 260 discharges. Services to unmarried parents and their children involved 2,459 cases or 37 cases above the March 1974 level. As can be seen from Table 11, the total caseload of children on adoption probation in April 1974 was 1,804; an increase of 41 cases in comparison to the previous month.

TABLE 1. GENERAL ASSISTANCE CASELOAD AND DEPENDANTS FOR MUNICIPALITIES WITH POPULATION 20,000 OR OVER, CLASSIFIED BY AREA, APRIL 1974*

* In order to permit comparisons, Family Benefits data have been grouped into General Welfare Assistance Administration units

** The above Family Benefits data reflect the entire area rather than only selected municipalities within the area.

*** To be consistent with General Assistance reporting, each foster child has been considered a case.

**** For Family Benefits data, residents of nursing homes are considered single persons.

***** Residents in chronic care hospitals receive a comfort allowance under the Family Benefits Act.

FOREWORD

The last issue of the Monthly Statistical Bulletin has been published as of April 1974. The publications of the subsequent issues have been delayed, pending revision of the format and content of the Bulletin. At present, these changes have not yet been finalized; however, we have had numerous requests for types of data that have been published in the Bulletin. Therefore, it has been decided to publish the December 1974 issue of the Bulletin in its present form, with additional summary tables on caseload, beneficiaries and expenditures relating to separate programs for the months of May to November 1974 inclusive.

We hope that these summary tables will solve, at least to certain extent, a problem of continuity of statistical information for the year 1974.

General Welfare Assistance

All municipalities with population in excess of 20,000 and all County Welfare Units and District Administration Boards are included in the statistics. Approximately 90 per cent of the provincial population resides in an area where General Assistance is administered by a municipality, County Welfare Unit or District Administration Board that is included in the bulletin. All tables on General Assistance are based on unaudited figures supplied by the municipalities.

Family Benefits

Family Benefits data presentation is similar to that regularly used for General Welfare Assistance Statistics. For example, where appropriate, Family Benefits data have been grouped to conform to General Welfare Assistance Administration Boards. However, totals for the areas in the Family Benefits tables reflect the entire area rather than only selected municipalities within the area.

Child Welfare

This section consists of tables providing data pertaining to children in the care of Children's Aid Societies.

It should be noted that for comparative purposes the basic data are reported monthly. However, additional tables are included in the bulletin on an ad hoc basis.

Unemployment Statistics

Based on its labour force survey Statistics Canada estimates the size of the labour force and the number of individuals employed and unemployed. This survey samples 30,000 households chosen by area sampling methods across the country. Indians living on reserves, inmates of institutions and members of the armed forces are excluded from the sample. The definitions and explanations used by Statistics Canada are as follows:

Labour Force - The civilian labour force is composed of that portion of the civilian noninstitutional population 14 years of age and over who, during the reference week, were employed or unemployed.

Employed - The employed includes all persons who, during the reference week: (a) did any work for pay or profit; (b) did any work which contributed to the running of a farm or business operated by a related member of the household; or (c) had a job, but were not at work, because of bad weather, illness, industrial dispute, or vacation, or because they were taking time off for other reasons. Persons who had jobs but did not work during the reference week and who also looked for work are included in the unemployed as persons without work and seeking work.

Unemployed - The unemployed includes all persons who, through the reference week: (a) were without work and seeking work, i.e., did not work during the reference week and were looking for work; or would have been looking for work except that they were temporarily ill, were on indefinite or prolonged layoff, or were temporarily laid off for the full week, i.e., were waiting to be called back to a job from which they had been laid off for less than 30 days.

Not in the Labour Force - Those not in the labour force include all civilians 14 years of age and over (exclusive of institutional population) who are not classified as employed or unemployed. This category includes those: going to school; keeping house; too old or otherwise unable to work; and voluntarily idle or retired. Housewives, students and others who worked part-time are classified as employed. If they looked for work they are classified as unemployed.

The number of unemployment insurance claimants is compiled by Statistics Canada from material supplied by the Unemployment Insurance Commission.

Differences between the number of unemployment insurance claimants and the number of persons unemployed according to the labour force survey have been explained as follows:

(a) Coverage. An individual without work and seeking work in the reference week and who was not covered by unemployment insurance (such as new entrants into the labour market) would be considered "unemployed" in the labour force survey but likely would not be an unemployment insurance claimant.

(b) Timing. The labour force survey is conducted at mid-week whereas unemployment insurance data are taken at the end of the month. This difference in timing would be particularly important in periods of rapidly changing employment levels.

(c) Definition. An individual is considered an unemployment insurance claimant when a claim for benefits is registered with the Commission, and remains a claimant until 4-6 weeks after the claim has been disqualified or benefits cease. If the claim is disqualified and the individual appeals the disqualification he is considered a claimant while the appeal is pending.

The definition used by the labour force survey would consider as employed an unemployment insurance claimant who worked part-time while drawing benefits.

HIGHLIGHTS

The two income maintenance programs available through provincial legislation are the municipally administered General Assistance program and the provincially administered Family Benefits program. The latter is designed to assist persons likely to require long-term assistance: the aged, widowed, blind, disabled and families where the male head is absent or permanently disabled. The General Assistance program is designed to assist persons who do not qualify for Family Benefits, such as those who are unemployed but employable and separated women with dependent children.

GENERAL ASSISTANCE

General Assistance statistics are included in the bulletin for all municipalities with population in excess of 20,000 and all County Welfare Units and District Administration Boards. About 90.0 per cent of the provincial population resides in an area where General Assistance is administered by a municipality, County Welfare Unit or District Administration Board that is included in the bulletin.

As is indicated in Table 1, total caseload in December 1974, excluding hostel residents, was 55,588 of which family units constituted 46.7 per cent of the total. The number of dependents was 60,931, or an average of 3.3 persons per family unit receiving General Assistance.

Table 1A provides a geographic distribution of a basic category of single persons and family units by class and sex. As can be seen from this table, 64.9 per cent of recipients are being reported as unemployables, the highest proportion of which (24.6 per cent) is female headed family units.

Table 2 provides a breakdown of General Assistance expenditures by various items. For areas covered by the bulletin, the allowances totalled about \$9.8 million in December 1974, of which 51.0 per cent was allocated to ordinary needs and 31.7 per cent to shelter.

Table 2A summarizes the information on caseload, beneficiaries and expenditures on transients and hostel residents as well as the Family Benefits recipients who are entitled to prescribed drugs under the General Welfare Assistance Act. It shows that 10,293 recipients and 14,794 dependents benefited from the prescribed drugs provision.

Table 3 provides a geographic distribution of beneficiaries in December 1974, with corresponding data on the assessed population. While the number of General Assistance beneficiaries averaged 1.6 per cent of the assessed population, it ranged from 0.5 per cent in Halton Regional Municipality to 3.6 per cent in Prescott and Russell County Unit. In large population centres such as Metropolitan Toronto and Ottawa-Carleton Regional Municipality, the number of beneficiaries averaged 1.6 and 1.5 per cent respectively.

FAMILY BENEFITS

Tables 6 to 10 provide a statistical analysis of the Family Benefits program. The Family Benefits data comprise the entire province as opposed to only the selected areas reported in the General Assistance section.

As can be seen from Table 6, the total Family Benefits caseload in December 1974 was 91,248, with the total expenditures amounting to about \$21.8 million.

Table 7 provides a distribution of beneficiaries by municipality with corresponding data on the assessed population. Although the percentage of beneficiaries in December 1974 averaged 2.6 per cent, it ranged from 0.9 per cent in Regional Municipality of Peel to 10.5 per cent in Manitoulin District.

As can be seen in Table 8, the majority of recipients on Family Benefits are disabled single persons with no dependent children (28,175) and deserted and unwed mothers (26,309).

CHILD WELFARE

Tables included in the bulletin contain statistical information on the child welfare program, covering the Children's Aid Societies throughout Ontario. Tables 11 to 15 contain basic data on monthly changes in caseload of children in care, their parents and services provided to them. The other tables provide more detailed analysis of various aspects of the Child Welfare program. They are included in the bulletin on an ad hoc basis.

As is indicated in Table 11, the total caseload of children in care in December 1974 was 13,718 or 305 cases below the previous months level. Table 12 indicates that 14,283 family units throughout Ontario received protection and prevention services involving 34,384 children.

Tables 13 and 14 provide information on the caseload of children of unmarried parents in care and on services being rendered to them. In December 1974, the total caseload of children of unmarried mothers was 3,410 involving 182 admissions and 325 discharges. Services to unmarried parents and their children involved 2,329 cases or 4 cases above the previous months level. As can be seen from Table 15, the total caseload of children on adoption probation in December 1974 was 1,704, a decline of 29 cases in comparison to the previous month.
